

DISASTER RISK REDUCTION

The internationally recognised annual Disaster Management Conference for Africa. Presented by the Disaster Management Institute of Southern Africa. In partnership with SALGA, the NDMC, SA Weather Service and the UN/ISDR.

DMISA

Building Resilience: Communities Getting Ready

DMISA, the voice of the Disaster Management Profession, proudly presents

conference 2013 11 - 12 September PROGRAMME

www.disaster.co.za

**President Hotel, Bloemfontein
Mangaung Municipality, Free State Province, South Africa**

The President Hotel is situated in the City of Roses and Judicial Capital of South Africa, set in the scenic Free State Province with its wide horizons and rich natural and cultural resources.

Message from the Member of the Executive Council

On behalf of the Free State Province, I would like to extend a warm welcome to the President of DMISA, the Executive Committee, Council, speakers and delegates to the Disaster Management Institute of Southern Africa's Conference 2013.

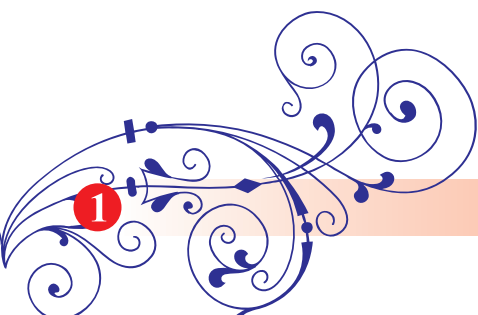

We, the Province's leadership, are delighted that this conference is being hosted in the City of Roses. Our conference venue, here in the Mangaung Metropolitan Municipality, is the ideal location for a conference of this stature. With the summer arriving and with it the potential for localised floods and other disasters, this conference will assist and make the residents of the province aware of the need to reduce their disaster risk.

It is only through consistent evaluation of disaster risks that one can plan for mitigation and preparedness in order to reduce disaster risk and increase resilience to disasters. Through the concerted efforts of all our disaster management officials throughout the province, the province is able to ready itself for those disastrous events which may occur.

The papers which will be delivered at the conference will increase the knowledge of disaster management among all delegates and will ensure that when they return to their place of employment, that they will be better prepared to give effect to the requirements of the legislation.

To the delegates, I trust that you will enjoy the conference and make use of all the opportunities that a conference of this nature and status holds, so that you are able to make use of the different options discussed to reduce disaster risk.

Ms SM Mlamleli
MEC: CoGTAHS
Free State

Message from the President

Honoured members and delegates

As the UNI/SDR Resilient Cities Campaign continues it is my privilege to welcome you to the DMISA Conference 2013 in the City of Roses.

The Disaster Management Institute of Southern Africa this year hosts its Annual Conference in partnership with SALGA, the National Disaster Management Centre, SA Weather Service and the UN/ISDR.

We wish to thank the Free State Province, South African Weather Service and the National Disaster Management Centre for providing financial support which is a major contributory factor towards the success of our conference.

A special very warm welcome to our members of DMISA, the Disaster Management Professionals of Southern Africa. This is your Conference and your Institute and the aim of this Conference is to provide you with learning and networking opportunities. The Institute exists to support you in your career and in your passionate endeavour to reduce disaster risk.

We express our sincere condolences and sympathy to all communities locally and globally who have been negatively impacted on by disasters and major incidents which have caused death, injury and destruction.

We commend the efforts of all agencies, government, provincial, municipal, non-governmental agencies and stakeholders who, through constant effort and persistence, are making positive inputs into reducing disaster risk.

I take this opportunity to convey our sincere appreciation and gratitude to all the speakers who will be presenting papers at this conference. We are honoured by their willingness to share their know-how and expertise. As usual this Conference has succeeded in attracting knowledgeable expertise and proficient professionals in Disaster Risk Reduction.

It is my wish that we all take as much as possible out of the conference and implement and monitor this within our own environments, and that our progressive and united actions are geared towards ensuring that we continue to work together for a common cause.

I trust that your deliberations will be fruitful and that you will have an enjoyable and pleasant stay in the Capital of the Free State Province.

To all my colleagues who have worked so hard to make this conference a success, please receive my heartfelt appreciation and thanks.

I wish you a successful DMISA 2013 Conference.
